## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Summary Risk Indicator (“SRI”)

Lower Risk

Higher Risk

Potential Lower Reward

Potential Higher Reward

This product is classified as 1 out of 7 which is the lowest risk class. This classification is based on the PRIIP Methodology for Market Risk Measure (MRM). This rates the potential losses from future performance at a very low level and poor market conditions are very unlikely to impact the capacity to pay you. Please note that the product’s classification is not constant and may change over time. Other risks materially relevant to the product that are not included in the SRI include liquidity risk, operational risk, environmental risks etc, could amplify the variation of product performance.

This SRI assumes you keep the product for 3 years. The actual risk can vary significantly if you cash earlier, and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back. For more information, please refer to section below “HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY”.

The SRI is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Market developments in the future cannot be accurately predicted. The scenarios shown in the section “Performance Scenario” below are only an indication of some of the possible outcomes based on projected returns. Actual returns could be lower. A comprehensive analysis of the relevant risks, including general risks (i.e. investment shares carrying non-voting rights, political, economic, legal and currency risks), management risks, and other risks are elaborated in the “RISK FACTORS and INVESTMENT CONSIDERATIONS” section of the Company’s prospectus and the Investment Compartment’s offering supplement, respectively. This product does not include any protection from future market performance, so you could lose some or all your investment.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. This means it is difficult to estimate how much you would get back if you are willing to cash in before the recommended holding period (3 years).

### WHAT HAPPENS IF THE PRIIP IS UNABLE TO PAY OUT?

In the event of default of the Investment Compartment, the investors are expected to face a financial loss. Deposits by collective investment schemes are excluded from the Cyprus Deposit Guarantee and Resolution of Credit and Other Institutions Scheme. The investors in the Investment Compartment are not protected by any investor compensation or guarantee scheme.
